

Tool and Machinery Rental Agreement

This Agreement is made by the Lessor and the Renter named in the Parties section.

1. Tools and equipment

The Lessor rents _____ (the "Equipment"). Additional identification, manuals, accessories, attachments, and condition notes may be recorded in the Details, Items, and photo appendices. The Parties should confirm at handover which items, guards, and safety devices have been supplied.

The Lessor must deliver Equipment suitable for its stated purpose and disclose known operational or safety defects. The Renter may decline unsafe Equipment and must report apparent damage or missing safety parts before use.

2. Period and rental fee

The period of rental is _____. The rental fee is _____. Payment, deposit, pickup, delivery, and return arrangements, where agreed, are shown in Details or otherwise recorded by the Parties. Extensions require agreement before the scheduled return.

3. Trained and authorised operation

The Renter is responsible for ensuring that Equipment is used only by persons with the skills, supervision, protective equipment, and licences required by law or the nature of the Equipment. The Renter must follow supplied operating instructions, workplace safety rules, and manufacturer warnings. Protective guards and emergency stops must not be bypassed.

The Equipment must be used only for its intended tasks and within its rated capacity. It must not be rented onward, modified, dismantled, or transferred to an unapproved site without the Lessor's agreement. Use that requires a specialised licence or certification is not authorised merely by signing this Agreement.

4. Inspection and care

Before each use, the operator should check for visibly unsafe conditions, damaged cables, leaks, worn attachments, and loose guards as appropriate. If the Equipment becomes unsafe or malfunctions, use must stop, power sources must be isolated where safe, and the Lessor must be notified. The Renter may carry out only routine care described in the instructions, unless repairs are approved.

The Lessor remains responsible for maintenance and defects to the extent required by law. The Renter must protect the Equipment against theft and prevent avoidable exposure to weather, water, or misuse.

5. Damage, breakdown, and loss

The Renter should promptly report accidents, loss, theft, or material damage, with available details. Each Party bears responsibility only to the extent established by law, this Agreement, and the circumstances. Normal wear and pre-existing faults do not create a claim against the Renter. Neither Party may exclude liability that cannot legally be excluded.

If a defect prevents agreed use without fault by the Renter, the Parties shall seek a lawful remedy, which may include repair, replacement, or a price adjustment. The Renter is not required to continue using unsafe Equipment.

6. Return

The Equipment must be returned at the end of the rental period, reasonably clean, with the supplied accessories and guards. The Parties should document its condition and any missing parts. Charges for cleaning, repair, replacement, or late return require an agreed and lawful basis; any deposit deductions must be explained.

7. Agreement and governing rules

The document and completed Details, Parties, Items, and photo appendices represent the rental record. Applicable safety laws and mandatory consumer rules prevail over any conflicting term.
